Urgent Need for Modern Therapeutics to Boost Growth

Nowadays, numerous new, modern therapies are emerging across the world. The demand for more effective therapeutics is also rising day by day. Earlier, the traditional treatment options had limitations for the doses of immunosuppressants and glucocorticoids. They could be used up to a certain extent. However, today's innovative therapeutic options help in treating a wide range of myositis.

Moreover, as more and more difficult-to-treat cases of idiopathic inflammatory myopathy increased, mankind realized the dire need for state-of-the-art therapies. It further created a high unmet demand for treatment options. It is expected to be one of the most crucial idiopathic inflammatory myopathy treatment market growth drivers.

Polymyositis Segment to Lead: Rising Prevalence of this Myopathy

By disease type, the market is divided into necrotizing autoimmune myopathy (NAM), dermatomyositis (DM), inclusion body myositis (IBM), polymyositis (PM), and others. Out of these, the PM segment had acquired 44.4% idiopathic inflammatory myopathy treatment market share in 2018. It is expected to retain its leading position throughout the forecast period. It is likely to occur as PM is considered to be one of the highly occurring forms of myositis. It is also capable of causing disability in those people who do not seek medical treatment immediately. Besides, increasing prevalence of PM worldwide and its presence in numerous clinical pipeline by industry giants would propel the growth of this segment. The other segments have also contributed to the steady growth of the market.
